PETER J. DESCHENES, DDS

FAMILY DENTISTRY

Washington Valley Office Park

163 Washington Valley Road, Suite 102, Warren

By: Nancy Millman

In the market for a new dentist? Looking for a Doctor who incorporates cutting edge technology with a gentle style and quiet confidence? **Dr. Peter Deschenes** has an extraordinary family dental practice right here in Warren. He is passionate about his profession and is a big believer in patient education and participation. His practice is characterized by a deep compassion for his patients, and an authentic commitment to their thorough understanding of their dental needs and recommended treatment.

Dr. Deschenes has been in Warren for fifteen years, and prior to that, had an office in Elizabeth for over seventeen years. His cumulative experience of over thirty-two years in the field ensures that he can manage every aspect of general dentistry. In addition, **Dr. Deschenes** is skilled in the treatment of snoring and sleep apnea.

Part of the exciting philosophy of his dental practice is the belief that patients should fully understand their own needs and be active participants in their treatment planning. To accomplish this, **Dr. Deschenes** uses an intraoral camera and digital X-rays for diagnostic evaluation. Patients are able to actually see the areas in their mouths that require treatment. **Dr. Deschenes** takes the time to educate each patient by providing information and answering questions. As a patient of this practice, you will be able to fully understand your dental needs and make informed decisions regarding treatment. It is not just about taking your doctor at his word – you will SEE for yourself. The practice also

utilizes the Cadent iTero™ digital intraoral scanning system for most crown and implant impressions. This new revolutionary technique and equipment guarantees a very high degree of accuracy and quality that promotes greater patient comfort and satisfaction.

Research into the successful treatment of sleep apnea has demonstrated the efficacy of dental appliance therapy for the treatment of mild to moderate sleep apnea. **Dr. Deschenes** has achieved remarkable results with many of his patients who are candidates for use of this device. Using a comfortable oral airway dilator appliance is one of the most efficient and effective methods of treating primary snoring as well as mild to moderate obstructive sleep apnea. Sleep apnea is a serious medical condition that can be associated with many severe health issues. If you suffer from this disorder a consultation with your physician for evaluation and possible sleep study is highly recommended.

Dr. Peter Deschenes has a great location and very accommodating office hours. The office is conveniently located in Warren at 163 Washington Valley Road, Suite 102 – and there is plenty of parking. Office hours are 10:00am-9:00pm on Monday, Tuesday and Thursday, and 10:00am-5:00pm on Fridays.

Dr. Deschenes and his highly capable staff look forward to meeting your entire family's dental needs. Call for an appointment at (732) 271-1818 and get started on the road to better dental health!
